

Stability Auto Car Program

The terms of participation

Monthly turnover of "Smart accumulation" structure from 5,000 USDT

The company provides a car for personal use.

With a stable maintenance of the turnover, the car becomes the property of the leader up to 5 years, depending on the turnover of the structure. A leader can expedite car buyouts by setting aside a portion of active income.

The cost of the car at the buyback is equal to the cost of the car,
+ interest on leasing payment (depending on the leasing term)

The class of the car depends on the monthly volume of "Smart accumulation" in the structure.

Stability Auto Car Program

When a leader appears in the structure who has fulfilled the conditions of the car program, his turnover is also taken into account in the qualifications of the superior leader with accrual from the turnover of “Smart Accumulation” in this structure according to the formula using the coefficient.

If there is a lack of turnover, you can continue to participate in the program with partial compensation of the company's costs until the turnover stabilizes, but no more than 3 months a year.

The car is provided under a lease agreement at the choice of the leader - new or with mileage up to five years of operation.

If there is a shortage of the monthly payment in the savings box, a portion of the payment will be deducted from referral rewards.

* The participant of the car program has the right to replace the car with an office rental, an annual trip for two or an apartment - postponing the car program bonus.

We wish you success!
