Career Development Plan

For stabilization of turnover development

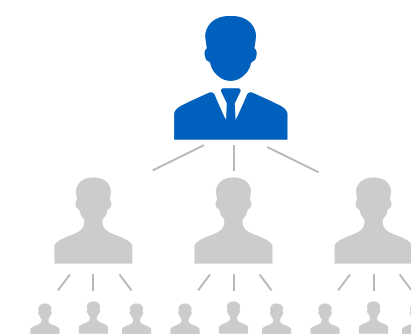

Binary Structure Scheme

For dynamic structure development

Cyclical Matrix Plan

For accelerating the start of newcomers

Ternary Multi-level Plan

Auxiliary, for motivation to mutual aid

Binary bonus

It is calculated from the full value of the marketing package minus the cost of the activation key, 50 USDT.

For example: Partner 1 has two branches - Partner 2 has a daily turnover of **9 000 USDT** and Partner's 3 turnover per day is **12 500 USDT**

The binary bonus is credited to Partner 1 as follows: **9 000 USDT x 11% = 990 USDT** - accrued binary bonus

The bonus is:

up to 11,5%

From the turnover of the command line with a lower turnover on that day, but not more than 20% for the entire structure depth of the total turnover

The percentage (%) depends on your marketing package and a daily limitation of 20% on the entire depth.

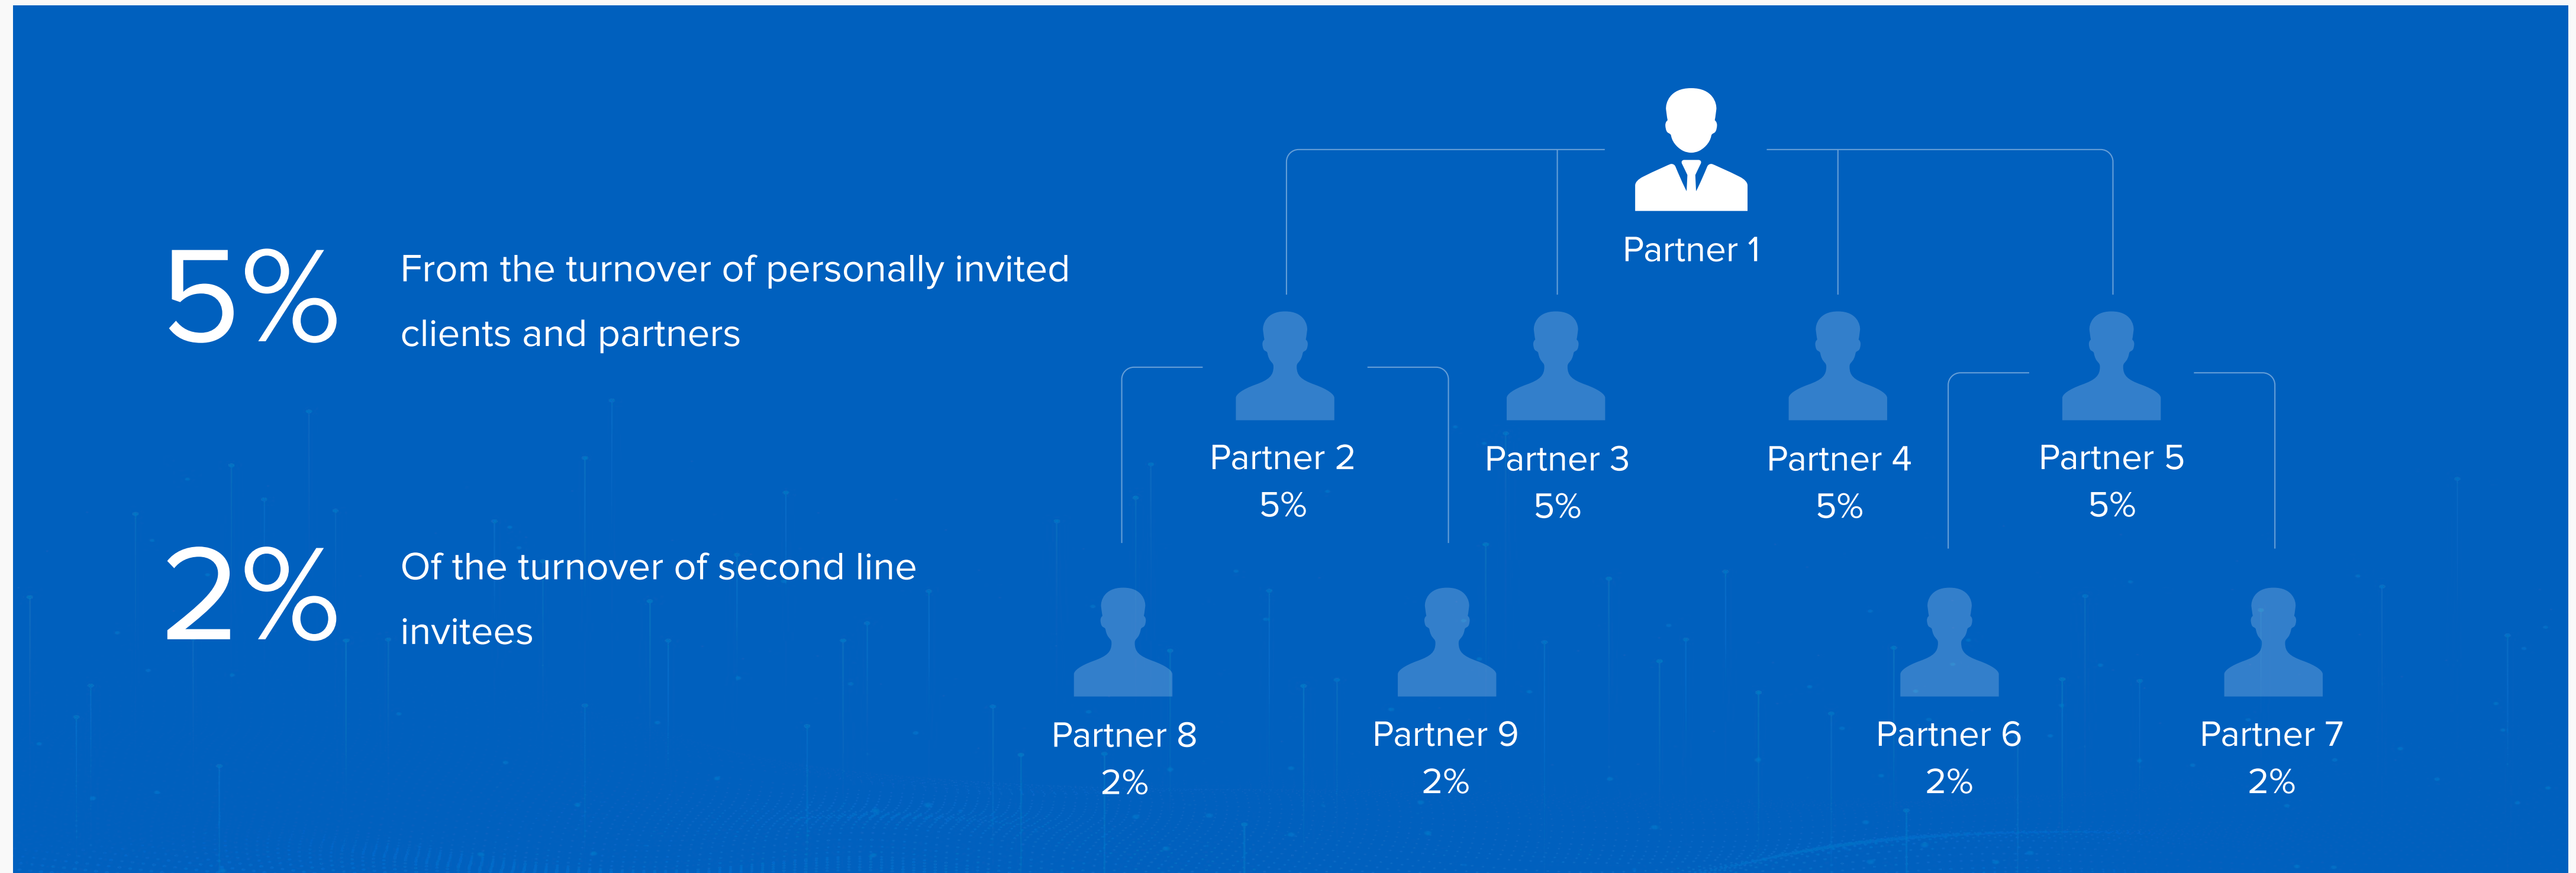

** Arrangement of registrations in the structure takes place in automatic mode in 2 teams until the personal turnover of 5000 USDT is reached in the sponsor branch

** The daily income limit is equal to the value of the package, but not more than 25, 000 USDT on the Royal Plus package

** Payment correction for the entire depth of the structure is carried out according to a special formula every day, to avoid exceeding the planned payments by no more than 20% of the total turnover, which makes the binary plan stable and durable

Referral bonus

Calculated from the full cost of the package, minus the cost of the activation key **50 USDT**

For example: Partner 1 invited Partner 2 to the project with payment for the marketing package **7 500 USDT**

Partner 1 gets **5% of the Referral Bonus** at the moment Partner 2 pays for the package

7 500 USDT x 5% = 375 USDT (Partner's 1 referral bonus)

If partner 2 requests partner 8 to pay **15 000 USDT** marketing package then partner 1 will earn **2% «referral bonus» 15 000 USDT * 2% = 300 USDT** (Partner 1 Referral Bonus)

Career bonus

Allows platform partners to receive a bonus from the turnover of the entire structure

Career bonus is calculated and credited based on the percentage difference between the achieved rank and the rank of lower Partners, starting from personally recommended and throughout the depth of the structure, ranging from 1% to 16%, depending on the career rank with consideration of business difference

Accumulated turnover through packages and smart accumulation for achieving each subsequent rank does not take into account the turnover of the previous rank

Accumulated turnover through smart accumulation to achieve each subsequent rank is reset on the 1st day of each calendar month

Accumulated turnover for smart accumulation to achieve each subsequent rank takes into account no more than 50% from one branch.
